

Is your feeder smart enough ?

A UNIQUE FEEDER APP

The cadence product line is the newest range of *Very* odd-shape component feeders from SEMO. Those digital feeders come with a unique smartphone application.

With Cadence Connect, get the full potential of SEMO smart feeders :

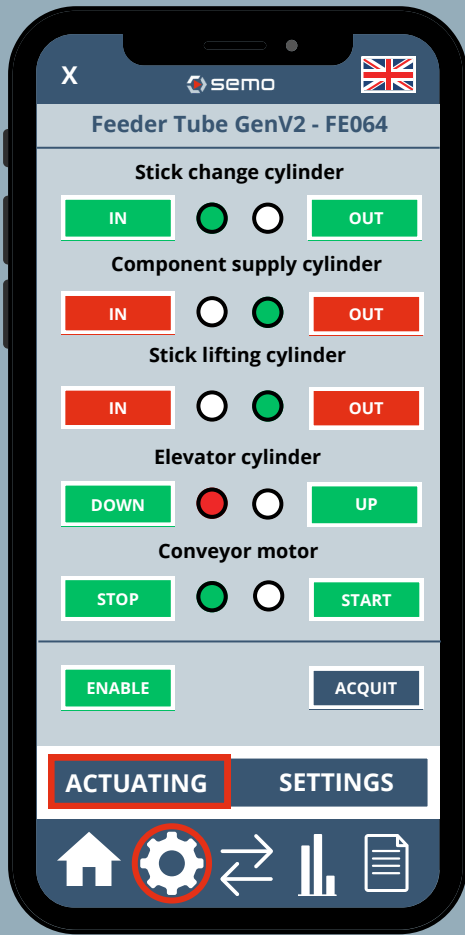

- ▶ **CONNECT** : interlink your Cadence Connect terminal to any SEMO feeder in your factory.
- ▶ **CONTROL** : get full access to the feeder settings and documentation.
- ▶ **OPTIMIZE** : operate, test and adjust any sensor or actuator of your feeder.

Terminal with
Cadence Connect
App

SEMO smart
feeder

Page for controlling actuators

CHARACTERISTICS

- ▶ Bluetooth communication with SEMO digital feeders activated through a QR code specific to the feeder
- ▶ Android based application usable on SEMO smartphone terminals
- ▶ Provides view of all sensors and actuators status
- ▶ Enables to control and test any actuator
- ▶ Provides access to the feeder settings to all authorized staff
- ▶ Enables to access and reset the feeder's production metrics : cycle time, total production counter, etc...
- ▶ Gives quick and easy access to the relevant PDF documentation
- ▶ Generates report of current settings and historical data to be shared with SEMO for fast troubleshooting
- ▶ Available in many languages

BENEFITS

With Cadence Connect application and SEMO smart feeders, you can connect, control and optimize :

- ▶ Easier preventive maintenance
- ▶ Faster problem solving
- ▶ Finer optimisation for optimum production
